

Advanced Diploma of Public Safety (Emergency Management) PUA60120

- Nationally Recognised Training

Course description:

This qualification is designed for personnel undertaking senior emergency management responsibilities at an organisational level. This will include management of community programs, stakeholder engagement and the negotiation of inter-agency memorandums of understanding. The roles of senior personnel in the management of and planning for an incident, emergency or disaster may include undertaking senior management responsibilities for managing multi-organisational teams and activities.

Who should enrol:

Prior to commencing this qualification individuals must be able to demonstrate the skills and knowledge to:

- Contribute to and assist with the management of an incident, emergency or disaster.
- Coordinate resources, personnel, entities and activities with other organisations
- Take personal responsibility and demonstrate autonomy in performing technical operations
- Make judgements required to organise self and plan, coordinate and evaluate the work of teams

These skills and knowledge may have been acquired through completion of the core units in the Diploma of Public Safety (Emergency Management) or relevant industry experience of no less than five years in the emergency management environment.

Course outcome:

This qualification includes the units of competency required by senior personnel to perform a range of activities such as working with the community and other key entities prior to, during and after an incident, emergency or disaster.

This involves prevention of, preparedness for, response to and recovery from such events.
