BENEFITS OF A MODERN TAFE NSW

We are modernising TAFE NSW to provide for the jobs of the future.

This modernisation program will:

> Provide students with more choice of what, where, when and how they study
> Improve access to value for money products and services across the state, in all regions
> Better meet the changing needs of industry and employers to help drive a strong economy
> Maxmise the use of existing facilities, allowing reinvestment in new technology, services and facilities
> Enable more education services for rural and regional communities, and continue to invest in opportunities for people who face disadvantage
> Create a more flexible, productive, commercially-savvy workplace
> Maintain our trusted reputation for high-quality outcomes
> Ensure TAFE NSW’s competitiveness and financial sustainability into the future

FOR EVERY $1 MILLION SAVED, TAFE NSW HAS THE POTENTIAL TO TRAIN A FURTHER 250 STUDENTS.
For more than 130 years, TAFE NSW has met the changing skills needs of our community and economy. Our world is changing and we need to move with the times.

The nature of work is shifting, along with the skills needed to provide the jobs of the future.

Technology has a profound impact on the way we work and the jobs the economy needs.

Students and employers want convenient and accessible training ‘anywhere, anytime’.

The education market is global, highly competitive and increasingly contestable.

Smart and Skilled reforms have prioritised government funding for jobs and skills in high demand industries.

NSW is in an economic boom. The state is benefiting from record investment in infrastructure and needs a strong supply of skilled workers to build it. The economy is changing rapidly. Technology is having a profound impact on the nature of work and the jobs needed to support the economy in the future. We are shaping a structure, a team and systems to respond quickly to opportunity. We are:

Creating a stronger, unified One TAFE NSW

Modernising our organisation so we can continue to provide the skills the economy and employers need, in the way students want.

Expanding our reach with greater access, value for money products and services, and more options for our students and communities with a stronger focus on digital learning.

Ensuring we are efficient and competitive so we can reinvest back into delivery and provide our students the best possible learner experience.

Maximising the use of our assets to allow reinvestment in modern facilities, technology and service.

Improving our systems and technology to better support students, and allow our teachers to focus on teaching, not administration.

Where savings are made the NSW Government will retain that money in the Skills budget to secure more skilling and training opportunities for our young people.

WHAT THE FUTURE LOOKS LIKE

STUDENTS

Better services and support for our students, including those in regional and rural communities, through investments in technology, facilities and innovative training methods.

More accessible, convenient learning via mobile training units, adaptable connected learning centres, state-of-the-art campuses and specialist centres, in the workplace and online.

INDUSTRY

Collaborative relationships with employers and industry partners to deliver job-ready graduates with skills powerfully aligned to economic and employer needs.

More convenient and practical training delivery, such as workplace-based training.

Job-ready graduates trained in state-of-the-art facilities using contemporary equipment and advanced simulation to meet the highest industry standards.

EMPLOYEES

Professional development and rewarding careers in an innovative, industry-leading workplace.

More efficient systems allowing our educational teams to focus on students, not administration.

Updated workplace industrial arrangements providing flexibility in training and services delivery.

THE COMMUNITY

Providing the skills for jobs to keep our communities strong and healthy.

Continued commitment to regional and rural communities through more accessible and convenient training.

Ongoing access to fee-free training, scholarships and other support programs for the most vulnerable and disadvantaged.

As the public provider of VET in NSW we will lead the development of programs that focus on the development and renewal of communities and regions.

“A GREAT STATE NEEDS A GREAT WORKFORCE. WE NEED TO MAKE SURE WE HAVE THE NEW TECHNOLOGIES AND SKILLS TO SUPPORT THE ECONOMY AND JOBS OF TOMORROW.”

THE HON JOHN BARILARO MINISTER FOR SKILLS
