QUALIFICATION

Certificate III in Printing

CAREER AREA

Engineering

TRAINING PACKAGE ENTRY REQUIREMENTS:

ENTRY REQUIREMENTS

TAFE NSW offers the Certificate III in Printing as an apprenticeship and to be eligible, you must:

- Be employed as an apprentice in the printing industry evidenced by a letter of support from your employer
- Submit your training plan proposal (TPP) with your application

IS THIS COURSE RIGHT FOR YOU?

To be prepared for this course, it is recommended that you have:

- An interest in the printing processes and related industries
- An interest in graphics and image reproduction for printing
- Good communication and problems solving skills

If you need help preparing for study, contact us about your options.

NATIONALLY RECOGNISED
TRAINING

- **Apprenticeship Allowed**
- **On campus**
- **Variable**

OVERVIEW

This qualification will give you a specialisation in Flexographic Printing.

This qualification applies to individuals working as print machinists who typically set up and operate letterpress, lithographic, flexographic, gravure printing presses, digital printers or screen printers and work on a range of printed products. They prepare material, monitor and run equipment and machinery and apply solutions to a defined range of unpredictable problems. They may also provide guidance to others with some limited responsibility for the output of others.

DEVELOP YOUR TALENT

Develop the personal qualities and skills you need to get ahead in this field, including:

- Communication and problem solving abilities
- An enthusiastic attitude

- The ability to take direction
- Collaboration and teamwork skills
- Attention to detail

ACHIEVE YOUR GOALS

Successfully completing this course will give you:

- A nationally recognised Certificate III qualification

GROW YOUR CAREER

Add to your printing knowledge with the Certificate III in Print Manufacturing or the Certificate III in Print Communications.

INDUSTRY DEMAND

The printing industry in Australia is worth \$8bn and there are over 4,500 printing businesses in operation. However, it is not only catalogues and pamphlets that are printed. Understanding how to professionally reproduce imagery for 2D and 3D construction will help to produce industry prototypes such as medical implants and sustainable fabrics. This shift from traditional to digital printing means there is a need for new ways of thinking and a demand for innovative, adaptable printers to continue to grow and transform the industry.
